

Main features:

- Small size,easy to carry and operate;
- Direct reading of dial gauge;
- Mechanical manual test process without electrical control;
- Widely applicable to quality monitoring in production site,with strong adaptability to working environ
- Precision shall comply with GB/T 38119,JB 6148 and GB 2411.

Scope of application:

- Suitable for measuring the Shore hardness of rubber,plastics and other materials,it is an ideal field t
- instrument.

Technical parameters:

- Measurement range:0-100(HA)
- Test force:550-8050(mN)
- Overall dimension:110x58x30(mm)
- Weight:about 0.5kg

Optional accessories:

- Constant load frame(Shore durometer support)
